### Spanish I

#### Course Description

Welcome to Español II! I am excited to be your Spanish teacher, and, together, we can make learning Spanish a rewarding experience. While learning another language can certainly be very exciting, it can also be quite challenging. It is important to keep a positive attitude, study regularly, and establish a good work ethic. Learning Spanish will also enhance your English language skills and help you in developing problem solving skills, both of which are critical in a modern world. In order to help everyone succeed and make learning fun, a variety of teaching techniques are utilized.

The objective in this course is for students to use the Spanish language in practical communication by listening, speaking, reading, and writing. Students will understand vocabulary and grammar appropriate to their level of study.

Students learn how to greet people, introduce and describe themselves and others, and speak about their family, school, and community. As students learn basic vocabulary and grammar skills, they expand on their knowledge and learn to speak about more complex topics such as shopping, weather, entertainment, and leisure activities. The first module will explain how to navigate the course and will introduce students to the Spanish language. Each lesson will present a new vocabulary theme, grammar structure, reading, listening, speaking, and writing activities, cultural lessons and activities, as well as various assessments.

To be successful, students need to print out the pacing chart on the course homepage, and check the assignments off as they are completed. Each
