COCKE COUNTY HIGH SCHOOL

PRE-PARTICIPATION PHYSICAL EVALUATION FORMS

Cocke County High School

Pre-participation Physical Evaluation Forms Checklist

- 1. Letter from TSSAA
- 2. Parent Consent/Medical Consent from Cocke County Board of Education (please read carefully) (to be signed by both athlete and parent/guardian)
- 3. Sudden Cardiac Arrest Information (to be signed by both athlete and parent/guardian)
- 4. Concussion Information (initial and sign appropriate places both athlete and parent/guardian)
- 5. History Form (complete before your appointment) (to be signed by both athlete and parent/guardian)
- 6. Physical Examination Form (to be completed by health care professional)
- 7. Medical Eligibility Form (to be completed by both parent/guardian and health care professional)
- 8. Consent for Athletic Participation & Medical Care (to be completed and signed by both athlete and parent/guardian)
- 9. Catastrophic Insurance Information

To student athletes and their parents/caregivers:

Before you can play a sport the TSSAA (Tennessee Secondary School Athletic Association) says you must get a sport's physical. This is also called a PPE (Preparticipation Physical Evaluation). The PPE promotes the health and well-being of athletes as they train and compete. It also helps keep athletes safe as they play sports. It is NOT meant to stop them from playing.

Where can you go to get a PPE? In the newest PPE guidebook, the groups below say your doctor's office or the place where you get your medical care is where you can go to get it done:

- · the American Academy of Pediatrics,
- the American Academy of Family Physicians,
- the American College of Sports Medicine,
- · the American Medical Society for Sports Medicine,
- · the American Orthopedic Society for Sports Medicine,
- and the American Osteopathic Academy of Sports Medicine.
- It's also endorsed by the National Athletic Trainers' Association and the National Federation of State High School Associations.

There are other places you can get a PPE, but we recommend athletes get a PPE during their Well Visit at their doctor's office or School Based Health Center. This ensures exams cover everything important about your overall health and well-being. It also limits absences from school and sports.

We encourage you to work the PPE into the routine health care you get at your doctor's office or the place where you get your medical care. If you're enrolled in TennCare your well visits are free.

Sincerely,

Tennessee Secondary School Athletic Association Tennessee Chapter of the American Academy of Pediatrics Tennessee Division of TennCare

Do you have TennCare and need to know who your doctor is? You can call your MCO at:

Athlete/Parent/Guardian Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form

What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens, blood stops flowing to the brain and other vital organs. SCA doesn't just happen to adults; it takes the lives of students, too. However, the causes of sudden cardiac arrest in students and adults can be different. A youth athlete's SCA will likely result from an inherited condition, while an adult's SCA may be caused by either inherited or lifestyle issues. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

How common is sudden cardiac arrest in the United States?

SCA is the #1 cause of death for adults in this country. There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year. It is the #1 cause of death for student athletes.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- · fainting or seizures during exercise;
- unexplained shortness of breath;
- dizziness;
- extreme fatigue;
- · chest pains; or
- · racing heart.

These symptoms can be unclear in athletes, since people often confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

What are the risks of practicing or playing after experiencing these symptoms? There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience SCA die from it.

Public Chapter 325 - the Sudden Cardiac Arrest Prevention Act

The act is intended to keep youth athletes safe while practicing or playing. The requirements of the act are:

 All youth athletes and their parents or guardians must read and sign this form. It must be returned to the school before participation in any athletic activity. A new form must be signed and returned each school year.

- The immediate removal of any youth athlete who passes out or faints while participating in an athletic activity, or who exhibits any of the following symptoms:
 - (i) Unexplained shortness of breath;
 - (ii) Chest pains;
 - (iii) Dizziness
 - (iv) Racing heart rate; or
 - (v) Extreme fatigue; and
- Establish as policy that a youth athlete who has been removed from play shall not return
 to the practice or competition during which the youth athlete experienced symptoms
 consistent with sudden cardiac arrest
- Before returning to practice or play in an athletic activity, the athlete must be evaluated
 by a Tennessee licensed medical doctor or an osteopathic physician. Clearance to full or
 graduated return to practice or play must be in writing.

I have reviewed and understand the symptoms and warning signs of SCA.

CONCUSSION

INFORMATION AND SIGNATURE FORM FOR STUDENT-ATHLETES & PARENTS/LEGAL GUARDIANS

(Adapted from CDC "Heads Up Concussion in Youth Sports")

Public Chapter 148, effective January 1, 2014, requires that school and community organizations sponsoring youth athletic activities establish guidelines to inform and educate coaches, youth athletes and other adults involved in youth athletics about the nature, risk and symptoms of concussion/head injury.

Read and keep this page. Sign and return the signature page.

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a "ding," "getting your bell rung" or what seems to be a mild bump or blow to the head can be serious.

Did You Know?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports **one or more** symptoms of concussion listed below after a bump, blow or jolt to the head or body, s/he should be kept out of play the day of the injury and until a health care provider* says s/he is symptom-free and it's OK to return to play.

SIGNS OBSERVED BY COACHING STAFF	SYMPTOMS REPORTED BY ATHLETES
Appears dazed or stunned	Headache or "pressure" in head
Is confused about assignment or position	Nausea or vomiting
Forgets an instruction	Balance problems or dizziness
Is unsure of game, score or opponent	Double or blurry vision
Moves clumsily	Sensitivity to light
Answers questions slowly	Sensitivity to noise
Loses consciousness, even briefly	Feeling sluggish, hazy, foggy or groggy
Shows mood, behavior or personality changes	Concentration or memory problems
Can't recall events prior to hit or fall	Confusion
Can't recall events after hit or fall	Just not "feeling right" or "feeling down"

^{*}Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention after a bump, blow or jolt to the head or body if s/he exhibits any of the following danger signs:

- · One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that not only does not diminish, but gets worse
- Weakness, numbness or decreased coordination
- Repeated vomiting or nausea
- · Slurred speech
- Convulsions or seizures
- · Cannot recognize people or places
- Becomes increasingly confused, restless or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHY SHOULD AN ATHLETE REPORT HIS OR HER SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brains. They can even be fatal.

Remember:

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care provider* says s/he is symptom-free and it's OK to return to play.

Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration such as studying, working on the computer or playing video games may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

* Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training.

Student-athlete & Parent/Legal Guardian Concussion Statement

Student-A	thlete Name:					
Parent/Le	gal Guardian Name(s):					
	After reading the information sheet, I am aware of the following informat	ion:				
Student- Athlete initials		Parent/Lega Guardian initials				
	A concussion is a brain injury which should be reported to my parents, my coach(es) or a medical professional if one is available.					
	A concussion cannot be "seen." Some symptoms might be present right away. Other symptoms can show up hours or days after an injury.					
	I will tell my parents, my coach and/or a medical professional about my injuries and illnesses.	N/A				
	I will not return to play in a game or practice if a hit to my head or body causes any concussion-related symptoms.					
	I will/my child will need written permission from a health care provider* to return to play or practice after a concussion.					
	Most concussions take days or weeks to get better. A more serious concussion can last for months or longer.					
	After a bump, blow or jolt to the head or body an athlete should receive immediate medical attention if there are any danger signs such as loss of consciousness, repeated vomiting or a headache that gets worse.					
	After a concussion, the brain needs time to heal. I understand that I am/my child is much more likely to have another concussion or more serious brain injury if return to play or practice occurs before the concussion symptoms go away.					
	Sometimes repeat concussion can cause serious and long-lasting problems and even death.					
	I have read the concussion symptoms on the Concussion Information Sheet.

Tennessee Secondary School Athletic Association

Catastrophic Insurance 2019-20 School Year

Our company, Loomis & LaPann, Inc., designs the Catastrophic Insurance Program for the Tennessee Secondary School Athletic Association. Again this year the TSSAA will provide a Catastrophic Insurance Policy that covers students and/or student athletes in all TSSAA sanctioned activities including travel to and from. The policy is underwritten by National Union Fire Insurance Company and has a \$500,000 Medical Limit with a \$15,000 deductible. Please note that sanctioned activities are activities that comply with all TSSAA rules and regulations and the TSSAA Catastrophic Insurance Coverage is extended for those activities only.

When Athletes, Coaches, and Athletic Directors are Covered

- Participating in a TSSAA sanctioned sport during the time outlined in the TSSAA Sports Calendar.
- 2. Practicing in a TSSAA sport during the time that conforms with the rules, regulations, and season outlined in the TSSAA Sports Calendar.
- 3. Summer Practice Must be a school team practicing as a unit during the time specified in the TSSAA Sports Calendar with a school coach in charge.
- Weight lifting and conditioning is only covered during the season when teams are allowed to practice.
- Preseason Scrimmages
- Team travel to and from an athletic practice and/or contest with a school coach in charge. Independent travel is not covered, i.e. athletes driving their own vehicles.
- Coaches and athletic directors are covered working all TSSAA sanctioned activities including travel to and from (Medical Limit - \$50,000; Deductible (Integrated) - \$5,000).

When Athletes, Coaches, and Athletic Directors are Not Covered

- 1. Open Facilities
- Weight Training and Conditioning At no time during the off-season is anyone covered.
- Summer Camps TSSAA catastrophic insurance does not cover team camps.
 The camp may be able to provide the coverage for the participants attending
 team camps or schools have the option to purchase the individual school
 coverage that would cover camps.
- 4. Student-athletes are not covered under the supervision of non-approved coaches or a coach that has not met the TSSAA coaching requirements.
- Coaches and Athletic Directors are not covered during open facilities, during offseason coaching (i.e. weight training and conditioning), or while coaching/working summer camps.

How to Report a Claim

- 1. The following information should be emailed to sports@loomislapann.com on school letterhead or a school incident report form.
 - a) Name of injured party.
 - b) Name, address, email, and phone number of injured party's parents or quardian.
 - c) Date of accident or injury
 - d) Brief overview of what took place
- 2. Keep a copy to verify you have reported the incident.
- 3. Loomis & LaPann will send out a claim form and claim filing instructions to injured party's parent or guardian. The claim form <u>MUST</u> be signed by Coach/AD at the school verifying the incident. Once the claim form has been signed it would be the responsibility of the parent or guardian to file the claim.
- 4. It is not necessary to report all injuries. The general procedure is to report any injury that may require surgery. Injuries that require surgery will probably penetrate the \$15,000 deductible.
